

SLURRY MICRO-SURFACING

A one day course providing a detailed technical introduction to the theory and practice of slurry surfacing, approved for CPD hours by the CIHT and IHE.

CPD ENDORSED COURSE

Slurry surfacing is a thin bituminous surface course incorporating bitumen emulsion, graded aggregate and fillers to restore the surface condition on roads, footways, cycle paths, car parks, playgrounds, central reservations, traffic islands and amenity areas. It is growing in popularity particularly in urban locations for treating road surfaces that need sealing, re-profiling and restoring skid resistance.

PROGRAMME

- 9.30 Welcome and Introduction
- 9.45 The Origins, Development and Benefits of Slurry Surfacing
- 10.15 Machine Applications - Carriageways, Airfields, etc.
- 10.45 Break
- 11.00 Manual Applications - Footways, Cycleways, Reservations
- 11.30 Site Selection and Surface Preparation/Patching
- 12.15 An Appreciation of Bitumen Emulsions for Slurry Surfacing
- 12.45 Lunch (**provided**)
- 13.30 Specification, Standards and Guidance
- 14.00 An Appreciation of Aggregates for Slurry Surfacing
- 14.30 Failures and Remedials on Slurry Surfacing Sites
- 15.00 Break
- 15.15 Multiple Choice Test - Reference Literature Provided
- 16.00 Close

ABOUT THE RSTA

The Road Surface Treatments Association (RSTA) is the UK's leading trade body and focal point for the road surface maintenance industry. It aims to raise awareness of the range and benefits of road surface treatments, promote workforce competence and safety and encourage sustainability. The RSTA champions professionalism, innovation and best practice.

TRAINING WITH THE RSTA

The RSTA is committed to raising standards within the workplace and each year runs a series of training courses for operatives, supervisors and management.
